#5 I think is just an update on what info is available on the public supply wells (influent sampling/ any other contaminants). I'm sending out an updated invite with call in info shortly. You are correct, the first time on the agenda pertains to what we call an integrated assessment (our removal and NPL listing folks combine efforts so that everything gets done concurrently.

Understood. Thank you for setting this first one up, Angela. I think this draft agenda will be fine for the first meeting. If I am incorrect in thinking the first item will include discussion on the scope of work EPA is putting together, then I ask that this be placed on the agenda. Also, if time permits, I would be interested in learning about what ARARs/TBCs EPA would propose including in a ROD for this pollutant or contaminant.

As a point of clarification, can item #5 be described a little more?

Based on the agenda below, I will be forwarding the invitation to the appropriate technical folks for DOH.

I am not seeing the call-in information referenced in the meeting invitation. Did you have a call-in number set up that would be included in the final invitation, or would you like me to look into setting one up for us?

Thanks again,

Krista

Subject: TENTATIVE - Hoosick Falls - Technical Staff Briefing (EPA/DEC/DOH)

When: Wednesday, January 20, 2016 12:00 PM-1:00 PM (UTC-05:00) Eastern Time (US & Canada).

Where: Call in info below

Krista/Bob

Given the short notice I'm using what is traditionally lunch time for next week (I will not be able to find a time that works for everyone at this point). I'll find something better for the following week, hopefully. I'm soliciting agenda input for priority items from you guys (I would like to get short term items teed up first) and will also be asking our folks too. This is a placeholder and I'll send out the final meeting invite as soon as we have a draft agenda.

Potential Topics

1. Information needed for integrated assessment/NPL listing
2. Available data collected by regulatory agencies
3. Information on potential source(s)
4. Identification of sampling locations
5. ? public supply wells
6. Communication strategy
7. Lead for outside inquiries
8. Health related
9. Investigation related
10. What else?

11. Interagency coordination

12. Bottled water testing

Edits/additions welcome.
